

ETH Montréal

Conference & Hackathon Sept 2023

ETH Montréal

Conference & Hackathon

September 18-21 2023

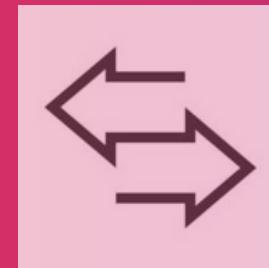

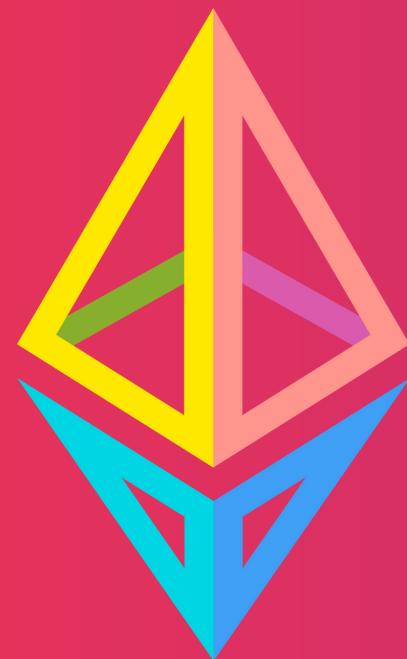

About ETH Montreal

A new community-driven initiative to grow and connect the local Ethereum community: developers, technical and social researchers, artists

Our mission

Overall, the goal is to foster innovation, collaboration, and education within the Ethereum community and to onboard local talents onto the Ethereum ecosystem by connecting them with leading researchers and builders, supporting their work, and providing opportunities for further engagement and growth.

Off-ramp: bringing value from the ecosystem to Montréal

On-ramp: onboarding local talents to the Ethereum ecosystem

About Montreal

World-class universities

Multilingual

Multicultural

Great transportation system

Global software hub

World renowned cuisine

One of the safest cities in NA

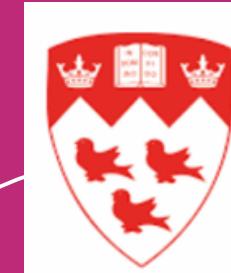

Beautiful weather in Sept

World-class universities

Our principles

- Inclusion and diversity
- Privacy
- Sustainability
- Public goods support

- Consensus
- Growth
- Transparency
- Accountability

Programming

3 days of hackathon:

- 250 hackers
- up to 50 judges from the local and global Ethereum mentors
- Workshops and tutorial

1-day conference:

- 1000 attendees
- Focus: core Ethereum R&D
- Opinionated: the structure, theme, and topics are decided by ETH Montreal team, and the best speakers for it are invited.

Speakers

Accepted tentatively:

Justin Drake, EF

a polymath researcher working at the EF. He has been involved in the Ethereum community since 2015.

Scott Moore, Gitcoin

entrepreneur and the co-founder of Gitcoin, a decentralized platform that connects developers with open source projects and helps fund the development of public goods.

Seb Audet, Zapper

Canadian entrepreneur and the co-founder of Zapper, a blockchain-based platform for managing and trading decentralized finance (DeFi) assets.

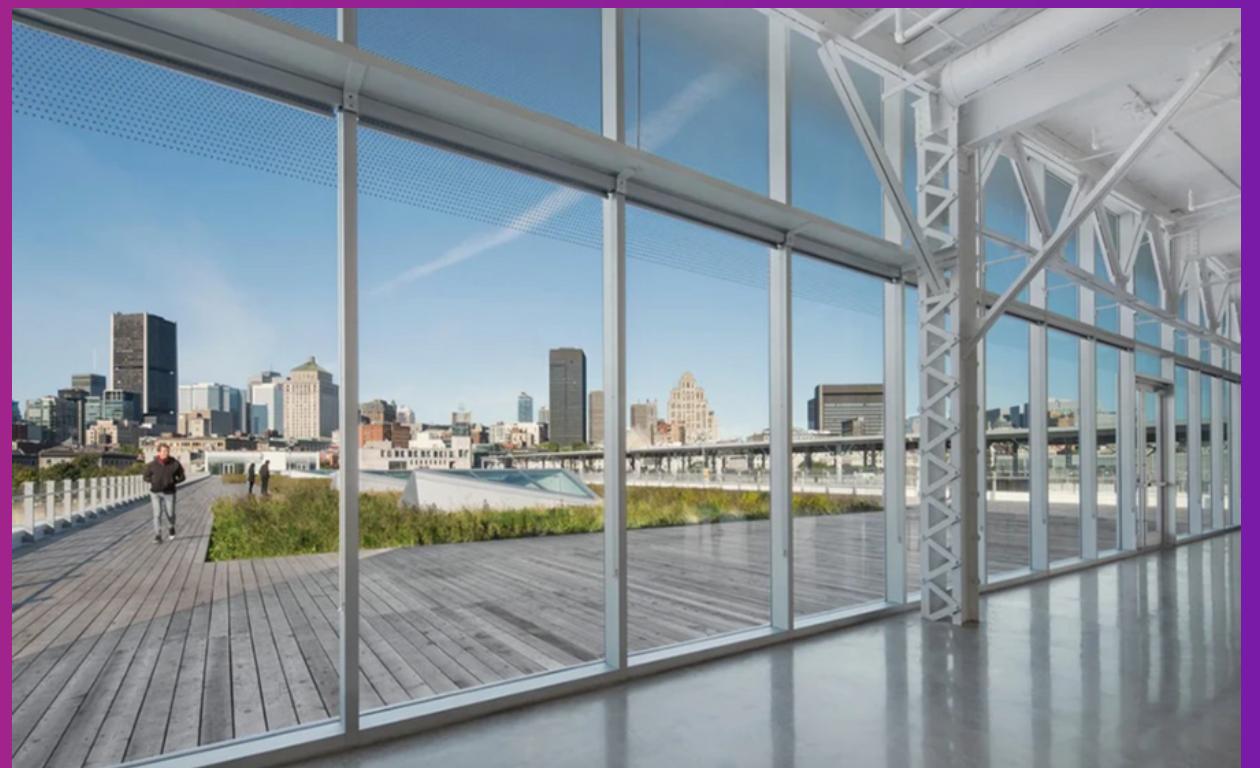

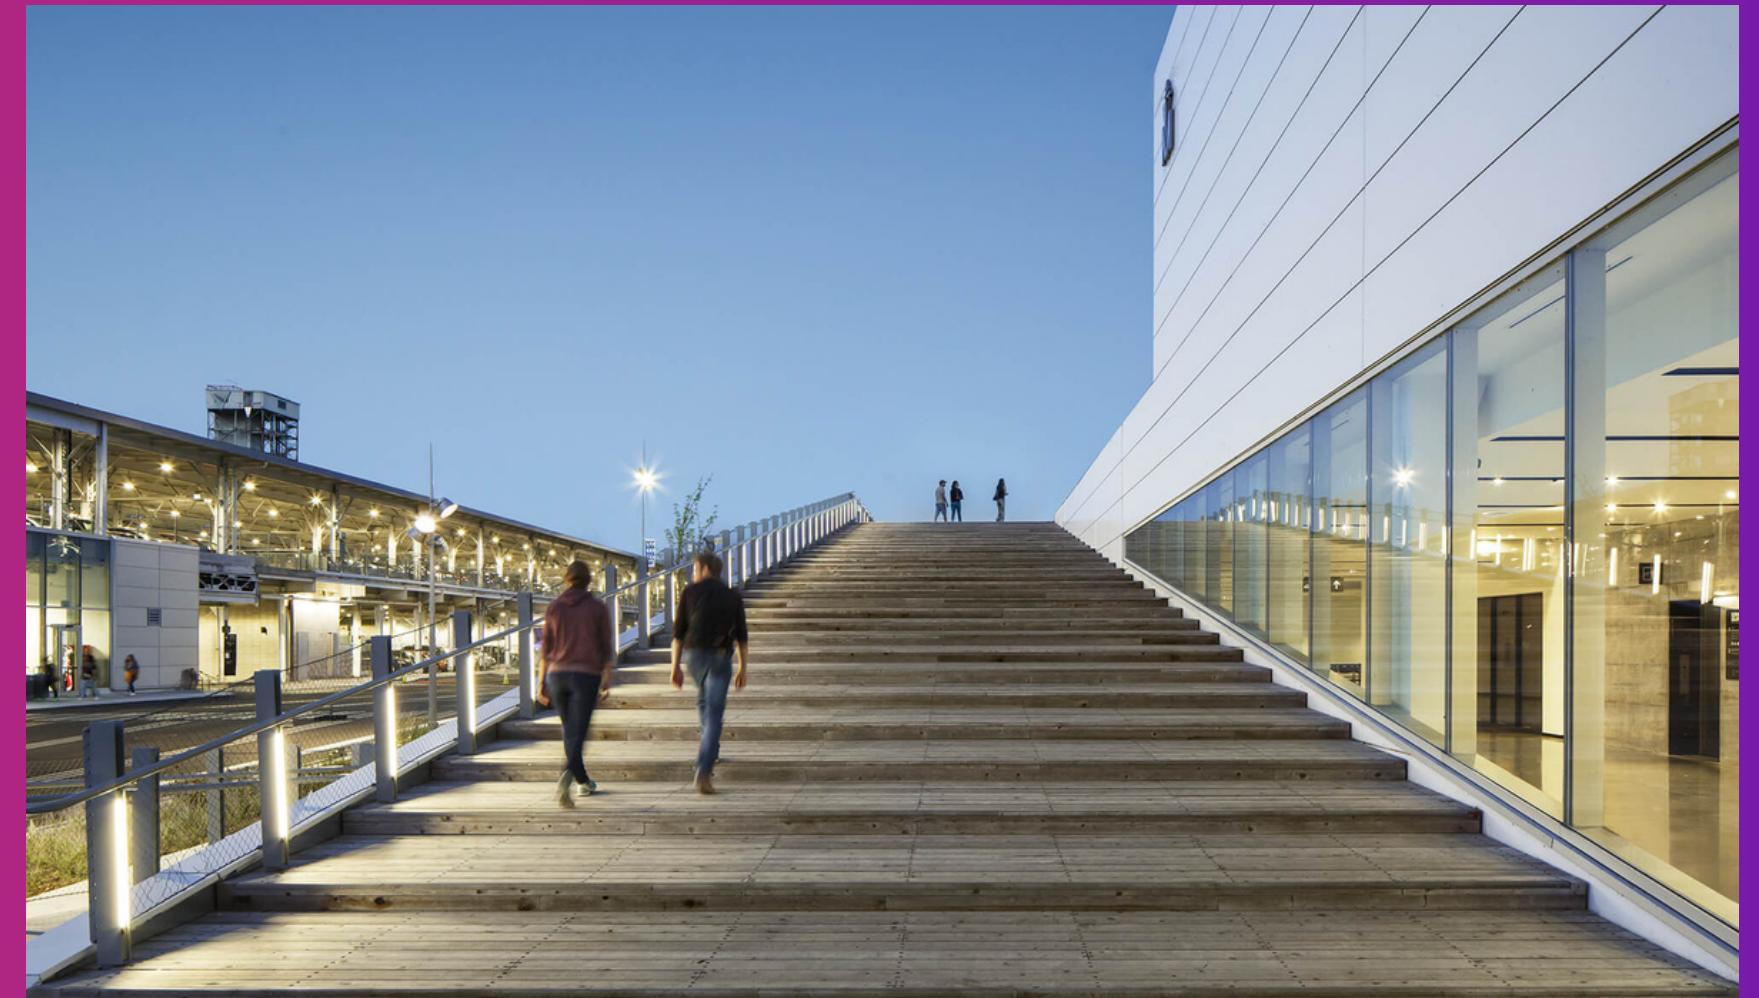

Dankrad Feist, EF

blockchain researcher and developer, who has been working at the EF since 2018. He is known for his contributions to the research and development of the Ethereum 2.0 upgrade.

Intended invitees: core Ethereum R&D researchers, Zero-knowledge proof & cryptography experts, and DeFi / MEV / NFT experts

Stunning venue: Le Grand Quai Pavillion & Terrace

Team

Governance committee:

- Ali Atiia, yAcademy
- Tim Beiko, Ethereum Foundation
- Philippe Castonguay, Horizon Games
- Scott Moore, Gitcoin

Execution team:

- Ali Atiia, yAcademy
- Pau Doy, ETH LATAM & ETH Argentina
- Val John, Yearn Finance
- Toño Romero, ETH Lima
